1 Executive Summary

COMPLIANCE DISTRIBUTION

VERDICT OVERVIEW

Management Attention Index

Source: Deterministic Assessment Engine

Management Attention Index Critical (Critical 1 · High 1 · Medium 1 · Low 0)

KEY DRIVERS

% 1 critical risk(s)

% 2 mandatory control gap(s)

% 1 high risk(s)

% Readiness 82%

Audit Readiness

Source: Deterministic Assessment Engine

Readiness (overall) Developing · 55%

Documentation Limited · 8%

1/12 controls backed by documented evidence (policy/procedure/document/audit report).

Operational Strong · 82%

Effectiveness of implemented controls (weighted compliance score).

Governance Strong · 100%

Average of governance-related categories (2).

Evidence Limited · 31%

12/12 controls with evidence, weighted by evidence strength.

Why This Matters

This section translates the assessment results into business language for executives, board members and management teams. It frames the findings in terms of business impact, regulatory exposure, operational consequences, financial implications and strategic priorities — not just a score.

- %, Business impact — how gaps affect day-to-day operations and service delivery.
- %, Regulatory exposure — where the organisation falls short of mandatory obligations.
- %, Operational consequences — the risks that materialise if gaps remain unaddressed.
- %, Financial implications — potential cost of incidents, penalties and remediation.
- %, Strategic priorities — what management should focus on first to reduce exposure.

lightspeedconsulting.ai

2 Subject and Scope

The following section documents the intake data captured for the assessed entity. These form the basis of the rule-based assessment.

ENTITY	Demo Entity GmbH
ENTITY NAME	Acme Utilities GmbH
SECTOR(S)	Energy, Water
CLASSIFICATION	Essential entity
DESCRIPTION OF OPERATIONS & IT LANDSCAPE	Regional energy and water utility with approx. 850 employees. Operates electricity, gas and water distribution networks, SCADA / control systems and a customer portal. On-premises data centre plus Microsoft 365 cloud. Critical systems: network control centre, billing system (SAP IS-U), GIS.
KEY THIRD PARTIES	Cloud provider, Software vendors, OT/equipment vendors
ESTABLISHED ROLES	Management involved, CISO / IT security, DPO, Risk management
KNOWN WEAKNESSES / OPEN POINTS	No consistent MFA for administrative access in OT. BCM plan exists, but no full recovery test since 2023. Supplier contracts lack uniform security clauses. Vulnerability scans only in IT, not OT.
MEASURES PER ART. 21	Risk analysis & security policies, Incident handling, Business continuity / backup, Vulnerability & patch mgmt, Cryptography / encryption, Training & awareness, Effectiveness reviews / audits

3 Assessment Principles

The assessment follows an audit-safe, three-layer model: the compliance decision (pass / partial / gap) is derived strictly from the intake answers by deterministic rules. No finding is invented by the AI. Risks are derived deterministically from the gaps. The AI is used solely for the explanatory analysis layer.

How This Assessment Was Produced

- %, Assessment responses were collected through structured intake.
- %, Compliance status was determined through deterministic assessment logic.
- %, Risks were derived from the identified gaps.
- %, AI generated explanatory insights, root cause analysis, clustering, management themes and roadmap recommendations.
- %, AI did not create, modify or override findings, risks, evidence or compliance results.

lightspeedconsulting.ai

4 Individual Findings

Source: Deterministic Assessment Engine

Each requirement was assessed against the captured evidence using deterministic rules. Gaps and partial compliance are accompanied by concrete remediation recommendations.

4.1 A20-1 — Management accountability & training

Article: Art. 20

PASS

EVIDENCE / OBSERVATION

Evidenced: Management involved, Training & awareness.

4.2 A21-1 — Risk analysis & security policies

Article: Art. 21(2)(a)

PASS

EVIDENCE / OBSERVATION

Evidenced: Risk analysis & security policies, Risk management.

4.3 A21-2 — Incident handling

Article: Art. 21(2)(b)

PASS

EVIDENCE / OBSERVATION

Evidenced: Incident handling.

4.4 A21-3 — Business continuity & backup

Article: Art. 21(2)(c)

PASS

EVIDENCE / OBSERVATION

Evidenced: Business continuity / backup.

4.5 A21-4 — Supply chain security

Article: Art. 21(2)(d)

FAIL

EVIDENCE / OBSERVATION

No evidence provided in the intake data.

IDENTIFIED GAP

Not evidenced: Supply chain security.

RECOMMENDED MEASURE

Implement / evidence: Supply chain security.

4.6 A21-5 — Security in acquisition, development & maintenance

Article: Art. 21(2)(e)

PASS**EVIDENCE / OBSERVATION**

Evidenced: Vulnerability & patch mgmt.

4.7 A21-6 — Effectiveness assessment of measures

Article: Art. 21(2)(f)

PASS**EVIDENCE / OBSERVATION**

Evidenced: Effectiveness reviews / audits.

4.8 A21-7 — Cyber hygiene & training

Article: Art. 21(2)(g)

PASS**EVIDENCE / OBSERVATION**

Evidenced: Training & awareness.

4.9 A21-8 — Cryptography & encryption

Article: Art. 21(2)(h)

PASS**EVIDENCE / OBSERVATION**

Evidenced: Cryptography / encryption.

4.10 A21-9 — HR security & access control

Article: Art. 21(2)(i)

PARTIAL**EVIDENCE / OBSERVATION**

Evidenced: DPO.

RECOMMENDED MEASURE

Implement / evidence: HR security & access control.

4.11 A21-10 — MFA & secured communications

Article: Art. 21(2)(j)

FAIL

EVIDENCE / OBSERVATION

No evidence provided in the intake data.

IDENTIFIED GAP

Not evidenced: MFA & access control.

RECOMMENDED MEASURE

Implement / evidence: MFA & access control.

4.12 A23-1 — Reporting obligations (24h/72h/1 month)

Article: Art. 23

PASS

EVIDENCE / OBSERVATION

Evidenced: Incident handling.

5 Complete Control Matrix

Complete, traceable overview of all assessed requirements with verdict.

ID	Article	Topic	Verdict
A20-1	Art. 20	Management accountability & training	Pass
A21-1	Art. 21(2)(a)	Risk analysis & security policies	Pass
A21-2	Art. 21(2)(b)	Incident handling	Pass
A21-3	Art. 21(2)(c)	Business continuity & backup	Pass
A21-4	Art. 21(2)(d)	Supply chain security	Gap
A21-5	Art. 21(2)(e)	Security in acquisition, development &	Pass
A21-6	Art. 21(2)(f)	Effectiveness assessment of measures	Pass
A21-7	Art. 21(2)(g)	Cyber hygiene & training	Pass
A21-8	Art. 21(2)(h)	Cryptography & encryption	Pass
A21-9	Art. 21(2)(i)	HR security & access control	Partial
A21-10	Art. 21(2)(j)	MFA & secured communications	Gap
A23-1	Art. 23	Reporting obligations (24h/72h/1 month	Pass

Evidence Strength Overview

Source: Deterministic Assessment Engine

Informational overview of the strength of evidence supporting the assessment. It does not affect scoring or compliance status.

Very high	1 (8%)
High	0 (0%)
Medium	0 (0%)
Low	11 (92%)
No evidence	0 (0%)

6 Risk Landscape

Source: Deterministic Risk Engine

The following risks were derived deterministically from the identified gaps (likelihood × impact).

RISK DISTRIBUTION

RISK HEATMAP

- R3** **FAIL** Efficiency in: MFA & secured communications (Impact 5 × Likelihood 4 = 20)
- R1** **FAIL** Efficiency in: Supply chain security (Impact 4 × Likelihood 4 = 16)
- R2** **PARTIAL** Efficiency in: HR security & access control (Impact 4 × Likelihood 2 = 8)

7 Recommendations and Roadmap

Prioritised remediation plan, derived from the gaps and risks.

Implement / evidence: Supply chain security.

Critical · 0–1 month · Procurement / vendor mgmt
Direct regulatory & operational exposure

Implement / evidence: MFA & access control.

Critical · 0–1 month · IT security
Direct regulatory & operational exposure

Implement / evidence: HR security & access control.

Medium · 3–6 months · IT security / HR
Moderate residual risk

Remediation Roadmap

PHASE 0-3 MONTHS

- %, Critical — Implement / evidence: Supply chain security.
- %, Critical — Implement / evidence: MFA & access control.

PHASE 3-6 MONTHS

- %, Medium — Implement / evidence: HR security & access control.

9 Conclusion

Demo Entity GmbH: 82% — 9 Passed, 1 Partial, 2 Gaps.

This report does not constitute a formal certification and does not replace assessment by a recognised authority. The compliance assessment is based on the information provided during intake.

Working Papers & Assessment Traceability

Source: Deterministic Assessment Engine

For every requirement this working paper records exactly why it was assessed as Pass, Partial or Gap: each assessment question with the response given, the evidence recorded (type, name, source and strength), the deterministic rule applied, the generated risk and the AI sections that referenced the requirement. No assessment result is a black box.

1. A20-1 — Management accountability & training

Article: Art. 20 · Rule ID: A20-1-RULE

PASS

ASSESSMENT QUESTION

Has the organization implemented and evidenced "Management accountability & training" as required by Art. 20?

ASSESSMENT QUESTIONS & RESPONSES

Question	Established roles
Answer	Management involved, CISO / IT security, DPO, Risk management
Question	Measures per Art. 21
Answer	Risk analysis & security policies, Incident handling, Business continuity / backup, Vulnerability & patch mgmt, Cryptography / encryption, Training & awareness, Effectiveness reviews / audits
Comment	Evidenced: Management involved, Training & awareness.

EVIDENCE MANAGEMENT

E-001 — A20-1

Requirement Management accountability & training

Type Statement

Strength Low

Used For Management accountability & training

Result Contribution Pass

DESCRIPTION

Evidenced: Management involved, Training & awareness.

E-002 — A21-1

Requirement Risk analysis & security policies

Type Statement

Strength Low

Used For Risk analysis & security policies

Result Contribution Pass

DESCRIPTION

Evidenced: Risk analysis & security policies, Risk management.

E-003 — A21-2

Requirement Incident handling

Type Statement

Strength Low

Used For Incident handling

Result Contribution Pass

DESCRIPTION

Evidenced: Incident handling.

E-004 — A21-3

Requirement Business continuity & backup

Type Statement

Strength Low

Used For Business continuity & backup

Result Contribution Pass

DESCRIPTION

Evidenced: Business continuity / backup.

E-005 — A21-4

Requirement Supply chain security

Type Statement

Strength Low

Used For Supply chain security

Result Contribution Gap

DESCRIPTION

No evidence provided in the intake data.

E-006 — A21-5

Requirement Security in acquisition, development & maintenance

Type Statement

Strength Low

Used For Security in acquisition, development & maintenance

Result Contribution Pass

DESCRIPTION

Evidenced: Vulnerability & patch mgmt.

E-007 — A21-6

Requirement Effectiveness assessment of measures

Type Audit report

Strength Very high

Used For Effectiveness assessment of measures

Result Contribution Pass

DESCRIPTION

Evidenced: Effectiveness reviews / audits.

E-008 — A21-7

Requirement Cyber hygiene & training

Type Statement

Strength Low

Used For Cyber hygiene & training

Result Contribution Pass

DESCRIPTION

Evidenced: Training & awareness.

E-009 — A21-8

Requirement Cryptography & encryption

Type Statement

Strength Low

Used For Cryptography & encryption

Result Contribution Pass

DESCRIPTION

Evidenced: Cryptography / encryption.

E-010 — A21-9

Requirement HR security & access control
